## RITESPEC TOWLIFT 3000

The product is ideal for a great deal of applications and so is a multi-purpose piece of equipment and suited for Plant Hire Fleets, Utilities / Highways, Railways and Facilities Management as well as for Agricultural, Timber / Logging, Commercial and Private use.

## The Benefits

The equipment has a useful load capacity at a useful radius, 1 ton @ 3 metres

The nose / drawbar weight is within the regulations in both laden and unladen conditions.

The Ritespec Towlift 3000 has a slew rotation to enable full coverage of the lifting zone and trailer bed, so the trailer can be easily loaded from either side and the crane has a 420 degrees of rotation stop to stop.

PCM introduced the Ritespec Towlift 3000 in March 2023 to enhance the current Ritespec product range as we have long considered that a 3.5 tonne trailer with a crane would be of use to many types of businesses for a range of applications.

We have been running a product development programme for the last few years in order to bring something to the market which could deliver all the benefits of a crane / trailer combination but that would also meet all safety and legislative requirements. We also wanted it to out-perform other crane / trailer equipment in this class currently available in the market. We feel that we have achieved this with the Ritespec Towlift 3000.

The equipment has had to comply with all the current safety legislation for lifting equipment, plus some additional requirements (as advised by ALLMI) specifically for lorry loader cranes.

The Ritespec Towlift 3000 has all the equipment normally seen on far larger lorry loader cranes incorporated into it's safety / stability system.

Much development work has gone into the safety system and we are confident that it now represents, in our opinion, the most comprehensive trailer safety system available for this type of equipment.

## Includes...

- ✓ The Ritespec Towlift 3000 is supplied with a full declaration of conformity and is UKCA marked.
- ✓ A comprehensive operator manual is supplied and will be retained with the crane trailer so that operator can refer to this.
- ✓ Full familiarisation training will be provided at handover and the operator will be taken through the product in detail and run through all the safety features.
- ✓ We will also provide a copy of Towing Guidance and the Law for each customer.
- ✓ We can also provide optional extras such as Work Lights / Beacons / Fold Down Sides, Hooks and Slings as well as other bespoke options.
